

Expert Balance

Friesian Gold

Composition

Soybean hulls, Barley, Wheat semolina, Oat bran, Calcium carbonate, Alfalfa, Corn gluten feed meal, Linseed, Cane molasses, Wheat, Corn, Sunflower seed meal, Magnesium oxide, Sodium chloride, Soybean oil, Soybean meal meal, Magnesium sulphate, Peas, Monocalcium phosphate, Yeast product, Magnesium chelate.

Analytical components per kg

Crude ash	14.4%
Crude protein	11.4%
Crude fat	4.9%
Crude fiber	11.8%
Magnesium	1.1%
Calcium	2.5%
Sodium	0.5%
Phosphorus	0.4%

Nutritional additives per kg

Zinc	436 mg
Copper	145,88 mg
Manganese	12 mg
Iodin	0.2 mg
Selenium	0,9 mg
Vitamin A	20400 I.E.
Vitamin D	3000 I.E.
Vitamin E	744 I.E.
Vitamin B1	27 mg
Vitamin B2	18 mg
Niacinamide	45 mg
Choline	899 mg
Calcium D-pantothenate	27 mg

Vitamin B6	18 mg
Biotin	15 mg
Folic acid	18 mg
Vitamin B12	60 ug
Vitamin C	449 mg
Vitamin K	9 mg
L-Lysine	6 mg
L-Threonine	4 mg
DL- Methionine	2 mg

Recommended dose

Horse (600 kg)	
Maintenance	0,75 – 1 KG
Light – medium labour	1,5 KG
Heavy labour	2 KG

Friesian Gold

Feed discription

In collaboration with Stal Baron Spahn, we have developed an all-round kibble, which is specially tailored to the needs of the Frisian breed. Friesian Gold Expert Balance contains the right foods to positively influence muscle building, skin, coat, hooves and endurance.

Although nowadays we no longer see the Friesian horse as a cold-blooded cart horse, the breed is originally quite sober. This means that she is more sensitive to carbohydrate- and protein-rich foods. Our Friesian Expert Balance takes into account these conflicting needs of a sober diet on the one hand and sufficient energy and proteins to be able to deliver sports performance on the other. The protein, starch and sugar in the Expert Balance have been kept as low as possible, but use has been made of easily absorbable energy sources, healthy fats and extra amino acids have been added to ensure that there are no shortages for muscle development. In addition, Friesian Expert Balance also contains a high level of natural vitamin E to slow muscle acidification and promote muscle recovery.

Zinc, Copper and Biotin

The right food for the Friesian horse is also important to prevent skin problems and to maintain the black color. Friesien Gold Expert Balance contains a high content of zinc, copper and various B vitamins including biotin. Zinc and copper are largely added as organic for better absorption. Zinc supports a beautiful, shiny coat and plays a role in the regulation of various skin functions and the construction of the skin structure. Copper is important in the pigmentation of the hair and helps to maintain the black color. Biotin is a well-known B vitamin that contributes to a healthy skin condition and strengthens the hooves.

Extra support

To provide extra support for your fries, we have an extensive range of supplements, which have been specially developed for the Friesian horse.

Usage

This product is suitable as a maintenance kibble and for horses that need endurance and muscle mass. Always provide sufficient quality roughage. Would you like more information about roughage? Read our roughage blogs.
